**About METALCON**

Established in 1991, METALCON is the largest international event in the metal construction industry. Unique in both its service and show management to this industry, METALCON is the only annual tradeshow and conference devoted entirely to the application of metal in industrial, institutional, light commercial and residential projects. Its success is based on three key methods of education: exhibits, an informative conference program and interactive, learning opportunities. METALCON is produced by PSMJ Resources, Inc., and sponsored by The Metal Construction Association. This is the event's first time in Pittsburgh.
